From our labs... innovative products made from Viscofan's native collagen blend, designed to make a difference in the world.

Viscofan's native Collagen Gel is produced using only the finest materials. Our collagen is sourced exclusively from the croupon portion of the bovine, resulting in a pure and consistent product.

The raw materials used for Viscofan's Nitta Collagen Gel™ are derived only from herds with negligible risk for BSE and are inspected by the United States Department of Agriculture (USDA).

Viscofan's Nitta Collagen Gel™ is an excellent starter material for medical devices and biomedical research. Our delicate manufacturing process allows for the highest percentage of intact native collagen fibers when compared to the competition.

- Excellent biocompatibility and biodegradable
- Customizable based on application
- Uniform fibers resulting from our unique proprietary homogenization process
- Validated through research institutes and 510k trials
- Unrivaled supply chain
- Manufactured in the USA

USES

Nitta Collagen Gel™ can be used in a variety of applications including but not limited to:

3D Scaffolds
Medical Device Coatings
Wound Care Products
Drug Delivery
Tissue Engineering
